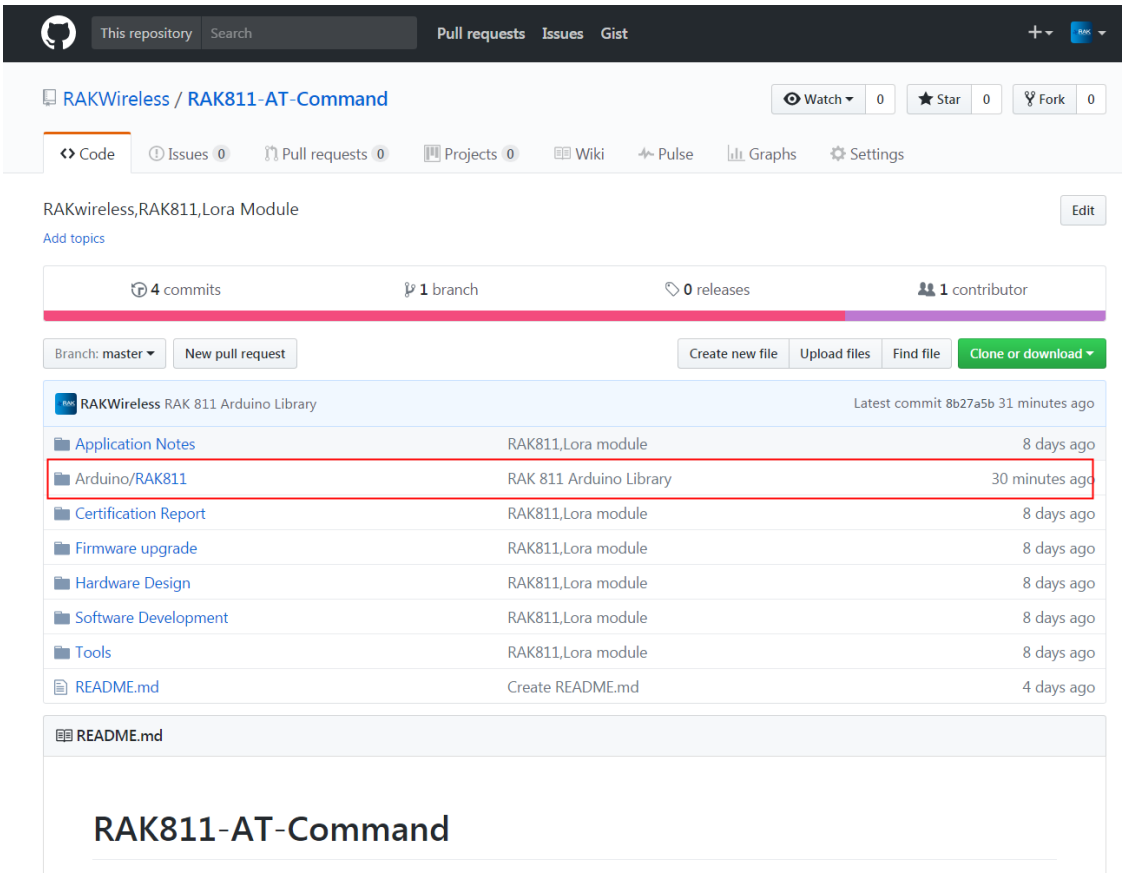
info@rakwireless.com

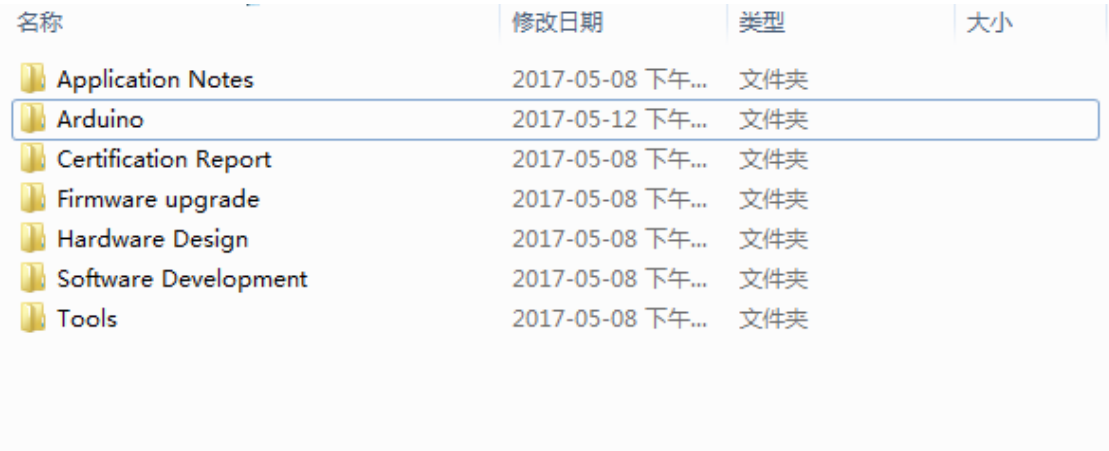
1. Download

We upload the RAK811 Arduino library code to the official github. You can find this library by searching RAK811 at github..

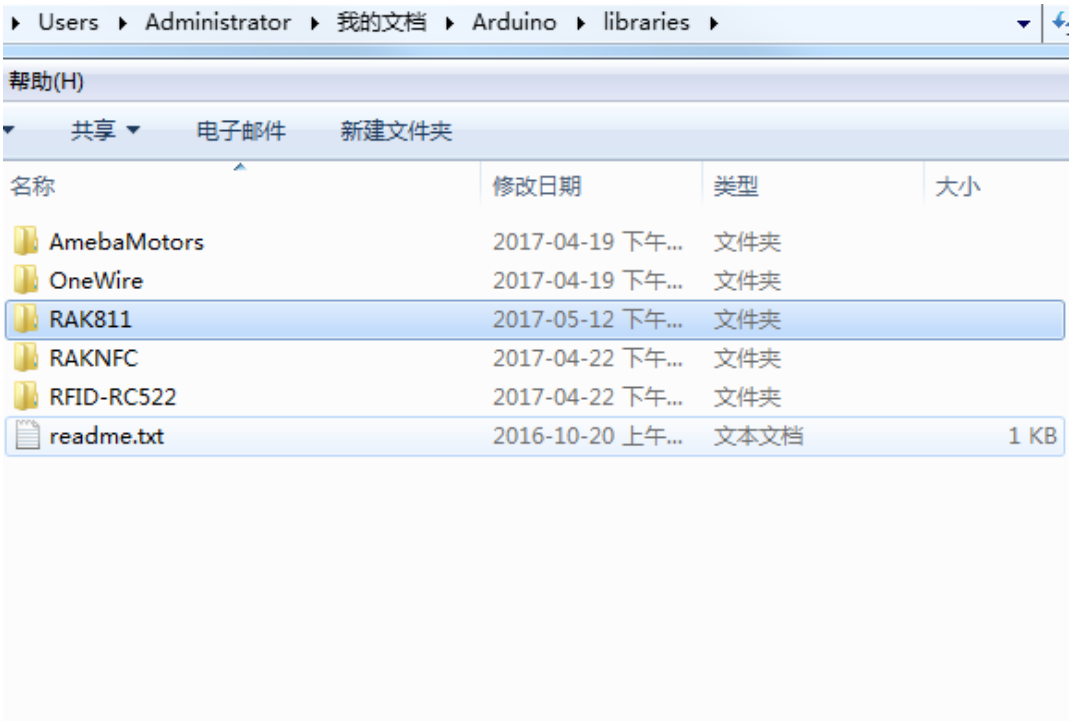


2. Add to Arduino IDE

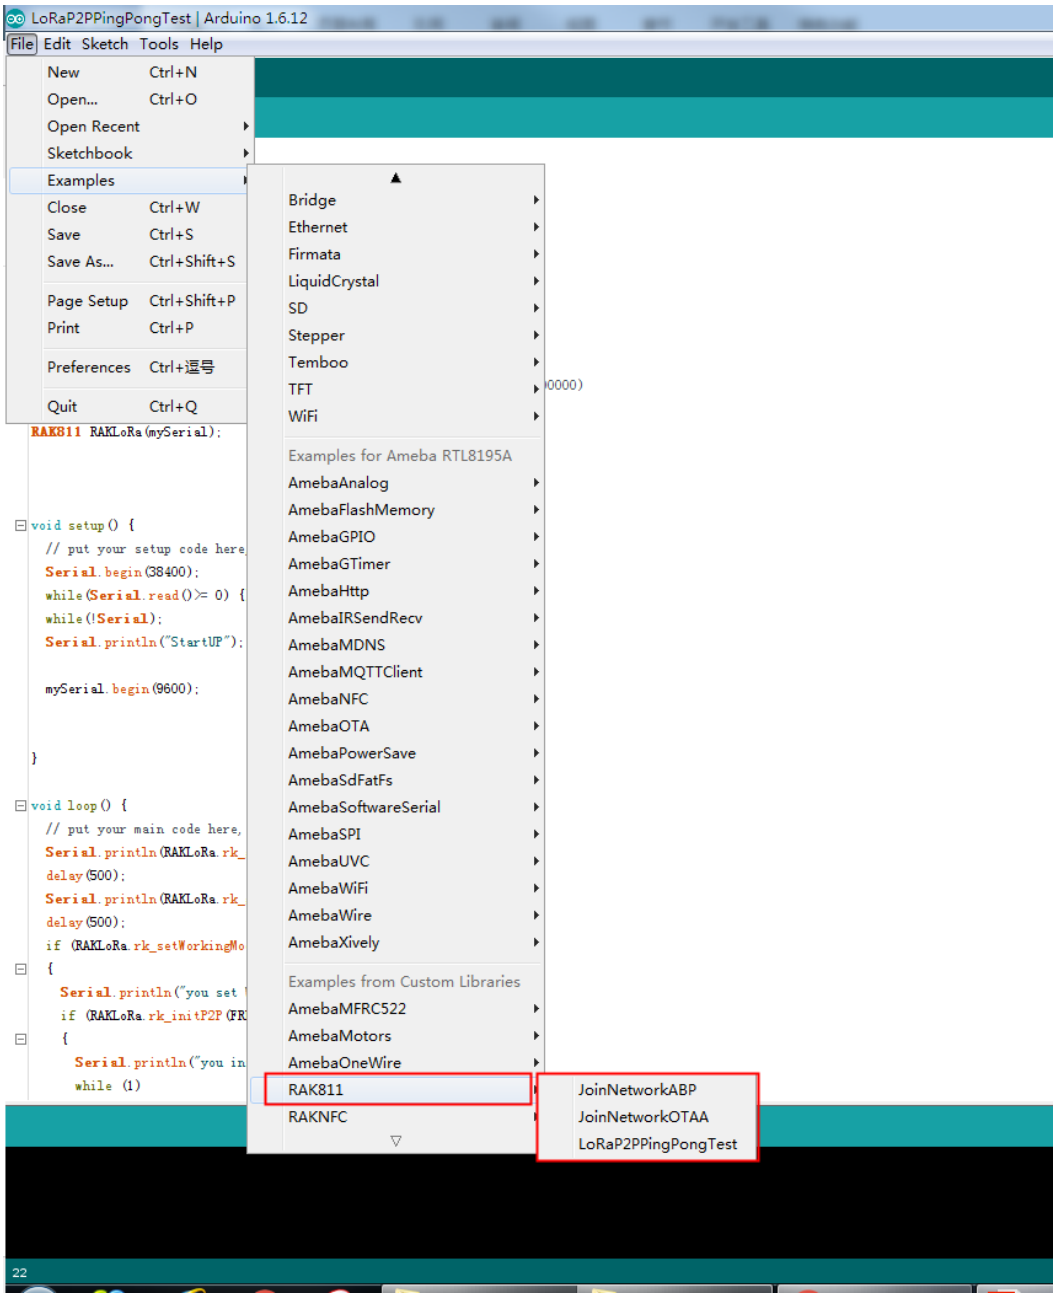
①Download the RAK811 Arduino library and find the downloaded file.



②Copy the RAK811 folder to the Arduino library folder.



③And then open the Arduino IDE, you can see the RAK811 sample code in the Arduino example.



3. Code introduction

The RAK811Arduino library contains a total of three typical application example code, respectively, the module LoRaWAN mode through the OTAA way to join the gateway and module LoRaWAN mode through the ABP way to join the gateway and the module to do LoRaP2P mode between the two modules to send data between each other.

On the library contains the available functions, the user can refer to the RAK811.h file, which has a detailed note on the use of each function.
